Prehistoric Europe Timothy Champion

The study of European prehistory has been revolutionized in recent years by the rapid growth rate of archeological discovery, advances in dating methods and the application of scientific techniques to archaeological material and new archaeological aims and frameworks of interpretation. Whereas previous work concentrated on the recovery and description of material remains, the main focus is now on the reconstruction of prehistoric societies and the explanation of their development. This volume provides that elementary and comprehensive synthesis of the new discoveries and the new interpretations of European prehistory. After an introductory chapter on the geographical setting and the development of prehistoric studies in Europe, the text is divided chronologically into nine chapters. Each one describes, with numerous maps, plans and drawings, the relevant archaeological data, and proceeds to a discussion of the societies they represent. Particular attention is paid to the major themes of recent prehistoric research, especially subsistence economy, trade, settlement, technology and social organization.
