Well-Architected Fluoropolymers: Synthesis, Properties and Applications

Bruno Ameduri, Bernard Boutevin

Well-Architected Fluoropolymers: Synthesis, Properties and Applications Bruno Ameduri, Bernard Boutevin

Because of the increasing need for ever better performing materials endowed with specific properties, macromolecular engineering has become a useful tool for designing well-architected polymers (telomers, telechelics, stars, dendrimers, alternating, block- and graftcopolymers). These polymers are nowadays seeing an enormous growth. Among them, fluoropolymers are seen as high value added materials in many applications ranging from surfactants, optical fibers, biomaterials, coatings, to membranes for fuel cells. Indeed, the relationship between structure of the monomer to the properties of the polymers is of increasing interest so that these properties are tuned for the most appropriate applications. As most fluoropolymers are prepared from radical synthesis, this book devotes various parts on the use of the controlled radical (or pseudo-living) polymerisation of fluoromonomers leading to discoveries of thermoplastic elastomers or original surfactants for polymerisation in supercritical CO₂.

Well-Architected Fluoropolymers: Synthesis, Properties and Applications, is composed of five chapters starting with a general introduction outlining basic concepts. Emphasis is placed on recent developments, and each chapter describes comprehensive techniques of synthesis of well-defined fluorotelomers or polymers, their properties, characterisations, and their applications, for immediate use by today's engineers, industrial and academic scientists, and researchers.

The book has been arranged to enable self-managed reading and learning. It is both a source of data and a reference.

- On the synthesis, properties and applications of fluoropolymers: remarkable, high value added materials applied in surfactants, optical fibres, biomaterials, coatings and membranes for fuel cells.
- For immediate use by today's engineers, industrial and academic scientists, and researchers
- Written to enable self-managed reading and learning, being both a source of data and a reference.

From reader reviews:

Charles Anthony:

What do you concentrate on book? It is just for students because they are still students or the idea for all people in the world, the actual best subject for that? Just you can be answered for that question above. Every person has different personality and hobby for each other. Don't to be compelled someone or something that they don't desire do that. You must know how great and also important the book Well-Architected Fluoropolymers: Synthesis, Properties and Applications. All type of book can you see on many options. You can look for the internet methods or other social media.

David Lussier:

The reserve untitled Well-Architected Fluoropolymers: Synthesis, Properties and Applications is the reserve that recommended to you to see. You can see the quality of the guide content that will be shown to a person. The language that writer use to explained their way of doing something is easily to understand. The article writer was did a lot of exploration when write the book, therefore the information that they share to you personally is absolutely accurate. You also might get the e-book of Well-Architected Fluoropolymers: Synthesis, Properties and Applications from the publisher to make you much more enjoy free time.

Sarah Farmer:

Playing with family in a very park, coming to see the water world or hanging out with buddies is thing that usually you could have done when you have spare time, subsequently why you don't try point that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Well-Architected Fluoropolymers: Synthesis, Properties and Applications, you may enjoy both. It is very good combination right, you still want to miss it? What kind of hangout type is it? Oh can occur its mind hangout fellas. What? Still don't obtain it, oh come on its called reading friends.

Angela Latham:

Are you kind of occupied person, only have 10 or maybe 15 minute in your time to upgrading your mind ability or thinking skill perhaps analytical thinking? Then you are experiencing problem with the book in comparison with can satisfy your limited time to read it because pretty much everything time you only find e-book that need more time to be go through. Well-Architected Fluoropolymers: Synthesis, Properties and Applications can be your answer given it can be read by anyone who have those short spare time problems.
