MicroRNA Expression Detection Methods Zhiguo Wang, Baofeng Yang

MicroRNAs (miRNAs), endogenous noncoding regulatory mRNAs of ~22 nucleotides, have rapidly emerged as the central players in gene expression regulation. Owing to their ever-increasing implications in the control of various biological and pathological processes, miRNAs have now been considered novel biomarkers of various human diseases including, cancer, viral disease, cardiovascular disorders, metabolic disturbances, etc. Particular expression profiles have been associated with particular pathological states. Expression profiling of miRNAs have therefore become extremely important not only for fundamentalists but also for clinicians. However, the methodologies used for detecting protein-coding mRNAs cannot be directly applied to miRNAs because of their small size. Over the past years, researchers have made great efforts to developing techniques suitable for miRNA detection and quantification; a wide spectrum of creative and innovative techniques (more than 30 different methods) have been invented and validated. It has come to the time now to summarize these methods and present them in an orderly manner for better understanding and utilization of these methods to miRNA research and applications. In particular, the development of methods for quantifying circulating miRNAs opens up a fascinating opportunity for realizing miRNA as diagnostic and prognostic biomarkers of human disease. A book on this subject may help boosting up the passion of researchers to further improve the existing techniques and develop more new methods to fit to new application needs. These considerations prompted us and urged us to undertake the work: writing a book focusing on miRNA expression detection methods.

From reader reviews:

Terry Tyrrell:

Why don't make it to be your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite reserve and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the reserve entitled MicroRNA Expression Detection Methods. Try to the actual book MicroRNA Expression Detection Methods as your pal. It means that it can to be your friend when you feel alone and beside that course make you smarter than ever before. Yeah, it is very fortunated for you. The book makes you much more confidence because you can know every little thing by the book. So , let us make new experience and knowledge with this book.

Judi Orta:

The guide with title MicroRNA Expression Detection Methods contains a lot of information that you can discover it. You can get a lot of profit after read this book. This specific book exist new know-how the information that exist in this reserve represented the condition of the world today. That is important to yo7u to learn how the improvement of the world. This kind of book will bring you throughout new era of the syndication. You can read the e-book on the smart phone, so you can read this anywhere you want.

Michael Banks:

Do you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you find out the inside because don't ascertain book by its include may doesn't work the following is difficult job because you are scared that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer might be MicroRNA Expression Detection Methods why because the amazing cover that make you consider about the content will not disappoint anyone. The inside or content is definitely fantastic as the outside or even cover. Your reading 6th sense will directly guide you to pick up this book.

Charles Krueger:

A lot of book has printed but it takes a different approach. You can get it by internet on social media. You can choose the most beneficial book for you, science, comic, novel, or whatever through searching from it. It is called of book MicroRNA Expression Detection Methods. You can add your knowledge by it. Without departing the printed book, it could add your knowledge and make an individual happier to read. It is most critical that, you must aware about guide. It can bring you from one destination for a other place.
