Prehistoric Mobility and Diet in the West Eurasian Steppes 3500 to 300 BC: An Isotopic Approach (Topoi) (English and German Edition) Claudia Gerling

The West Eurasian steppes in the Eneolithic, the Early Bronze and the Iron Age were largely inhabited by communities believed to show an elevated level of spatial mobility that is often linked to their subsistence economy. Questions concerning the mobility and migration as well as the diet and economy of these communities were approached by applying isotope analysis, resulting in a greater understanding of the lifeways they led.
