Who Cares about Particle Physics?: Making Sense of the Higgs Boson, the Large Hadron Collider and CERN Pauline Gagnon

CERN, the European Laboratory for particle physics, regularly makes the news. What kind of research happens at this international laboratory and how does it impact people's daily lives? Why is the discovery of the Higgs boson so important? Particle physics describes all matter found on Earth, in stars and all galaxies but it also tries to go beyond what is known to describe dark matter, a form of matter five times more prevalent than the known, regular matter. How do we know this mysterious dark matter exists and is there a chance it will be discovered soon? About sixty countries contributed to the construction of the gigantic Large Hadron Collider (LHC) at CERN and its immense detectors. Dive in to discover how international teams of researchers work together to push scientific knowledge forward.

Here is a book written for every person who wishes to learn a little more about particle physics, without requiring prior scientific knowledge. It starts from the basics to build a solid understanding of current research in particle physics. A good dose of curiosity is all one will need to discover a whole world that spans from the infinitesimally small and stretches to the infinitely large, and where imminent discoveries could mark the dawn of a huge revolution in the current conception of the material world.

From reader reviews:

Donald Farrell:

This Who Cares about Particle Physics?: Making Sense of the Higgs Boson, the Large Hadron Collider and CERN book is not really ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book is information inside this publication incredible fresh, you will get info which is getting deeper you read a lot of information you will get. That Who Cares about Particle Physics?: Making Sense of the Higgs Boson, the Large Hadron Collider and CERN without we realize teach the one who looking at it become critical in thinking and analyzing. Don't become worry Who Cares about Particle Physics?: Making Sense of the Higgs Boson, the Large Hadron Collider and CERN can bring when you are and not make your case space or bookshelves' turn out to be full because you can have it with your lovely laptop even telephone. This Who Cares about Particle Physics?: Making Sense of the Higgs Boson, the Large Hadron Collider and CERN having great arrangement in word and layout, so you will not experience uninterested in reading.

Dan Hanner:

A lot of people always spent their free time to vacation or go to the outside with them family members or their friend. Are you aware? Many a lot of people spent they free time just watching TV, or playing video games all day long. If you need to try to find a new activity that's look different you can read some sort of book. It is really fun for yourself. If you enjoy the book that you simply read you can spent the entire day to reading a book. The book Who Cares about Particle Physics?: Making Sense of the Higgs Boson, the Large Hadron Collider and CERN it doesn't matter what good to read. There are a lot of people who recommended this book. These people were enjoying reading this book. When you did not have enough space to develop this book you can buy the actual e-book. You can m0ore quickly to read this book from your smart phone. The price is not to cover but this book features high quality.

Carl Adams:

Don't be worry if you are afraid that this book can filled the space in your house, you will get it in e-book means, more simple and reachable. This specific Who Cares about Particle Physics?: Making Sense of the Higgs Boson, the Large Hadron Collider and CERN can give you a lot of close friends because by you taking a look at this one book you have factor that they don't and make you actually more like an interesting person. This kind of book can be one of a step for you to get success. This reserve offer you information that probably your friend doesn't recognize, by knowing more than different make you to be great persons. So , why hesitate? Let us have Who Cares about Particle Physics?: Making Sense of the Higgs Boson, the Large Hadron Collider and CERN.

Gordon Frederick:

That publication can make you to feel relax. This book Who Cares about Particle Physics?: Making Sense of the Higgs Boson, the Large Hadron Collider and CERN was colorful and of course has pictures on the

website. As we know that book *Who Cares about Particle Physics?: Making Sense of the Higgs Boson, the Large Hadron Collider and CERN* has many kinds or genre. Start from kids until teenagers. For example *Naruto* or *Investigator Conan* you can read and believe you are the character on there. So , not at all of book tend to be make you bored, any it can make you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading that will.
