Ergodic Theory and Fractal Geometry (CBMS Regional Conference Series in Mathematics) Hillel Furstenberg

Fractal geometry represents a radical departure from classical geometry, which focuses on smooth objects that "straighten out" under magnification. Fractals, which take their name from the shape of fractured objects, can be characterized as retaining their lack of smoothness under magnification. The properties of fractals come to light under repeated magnification, which we refer to informally as "zooming in". This zooming-in process has its parallels in dynamics, and the varying "scenery" corresponds to the evolution of dynamical variables. The present monograph focuses on applications of one branch of dynamics--ergodic theory--to the geometry of fractals. Much attention is given to the all--important notion of fractal dimension, which is shown to be intimately related to the study of ergodic averages. It has been long known that dynamical systems serve as a rich source of fractal examples. The primary goal in this monograph is to demonstrate how the minute structure of fractals is unfolded when seen in the light of related dynamics. A co-publication of the AMS and CBMS.

From reader reviews:

Mary Tiller:

This Ergodic Theory and Fractal Geometry (CBMS Regional Conference Series in Mathematics) are usually reliable for you who want to be described as a successful person, why. The reason why of this Ergodic Theory and Fractal Geometry (CBMS Regional Conference Series in Mathematics) can be among the great books you must have is usually giving you more than just simple studying food but feed you with information that might be will shock your previous knowledge. This book is definitely handy, you can bring it everywhere and whenever your conditions both in e-book and printed versions. Beside that this Ergodic Theory and Fractal Geometry (CBMS Regional Conference Series in Mathematics) giving you an enormous of experience like rich vocabulary, giving you demo of critical thinking that we all know it useful in your day action. So , let's have it appreciate reading.

Beth Sanders:

Your reading sixth sense will not betray a person, why because this Ergodic Theory and Fractal Geometry (CBMS Regional Conference Series in Mathematics) book written by well-known writer who really knows well how to make book which might be understand by anyone who read the book. Written throughout good manner for you, dripping every ideas and writing skill only for eliminate your current hunger then you still skepticism Ergodic Theory and Fractal Geometry (CBMS Regional Conference Series in Mathematics) as good book not simply by the cover but also by content. This is one e-book that can break don't evaluate book by its handle, so do you still needing an additional sixth sense to pick this!? Oh come on your examining sixth sense already told you so why you have to listening to yet another sixth sense.

Pablo McNamara:

Do you like reading a book? Confuse to looking for your favorite book? Or your book seemed to be rare? Why so many problem for the book? But almost any people feel that they enjoy with regard to reading. Some people likes reading through, not only science book but novel and Ergodic Theory and Fractal Geometry (CBMS Regional Conference Series in Mathematics) or perhaps others sources were given know-how for you. After you know how the good a book, you feel need to read more and more. Science reserve was created for teacher or perhaps students especially. Those books are helping them to put their knowledge. In different case, beside science publication, any other book likes Ergodic Theory and Fractal Geometry (CBMS Regional Conference Series in Mathematics) to make your spare time much more colorful. Many types of book like this.

Solange Smith:

Reading a book make you to get more knowledge from this. You can take knowledge and information from the book. Book is published or printed or highlighted from each source which filled update of news. Within this modern era like right now, many ways to get information are available for anyone. From media social

like newspaper, magazines, science publication, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just searching for the Ergodic Theory and Fractal Geometry (CBMS Regional Conference Series in Mathematics) when you necessary it?
