Insects of Stored Products David Rees

Insect infestations in grains and other stored food and fiber products cause annual losses worth many millions of dollars worldwide. This illustrated guide enables specialists and non-specialists to distinguish the major pests of durable stored products found throughout the world.

It describes how to identify each pest group or species and summarizes the latest information on their biology, ecology, geographical distribution, the damage they cause and their economic importance. Hundreds of color photographs illustrate the identifying features of the most important beetles, moths, psocids, bugs and wasps found in stored products.

Essential details on inspection and trapping are included to aid in the early detection of infestations, allowing more time to plan and undertake effective pest control. An extensive bibliography provides a convenient entry point to the specialized literature on these insects.

This concise yet comprehensive reference is an essential tool for people responsible for the storage and handling of dried durable products of plant and animal origin worldwide.
