The Southeast Asia Monograph Series is designed and dedicated to telling the story of USAF's participation in the Vietnam War. This monograph, the sixth in the Series, adds another exciting chapter to our continuing effort to bring forth and highlight the dedication, courage, and professionalism of the U.S. airman in combat. The primary intent of this series is to emphasize and dramatize the human aspects of this long and frustrating struggle, straying somewhat away from the cold hard statistics of "tons of bombs dropped" and "structures destroyed," etc., frequently the headlines in historical presentations. "Last Flight From Saigon" is an exciting and moving account of how all our Services, as well as several civilian agencies, pulled together to pull-off the largest aerial evacuation in history-what many have referred to as a modern day Dunkirk. The three authors, intimately involved with the evacuation from beginning to end, have carefully pieced together an amazing story of courage, determination and American ingenuity. Above all, it's a story about saving lives; one that is seldom told in times of war. All too often, critics of armed conflict make their targets out to be something less than human, bent on death and destruction. One need only study the enormity of the effort and cost that went into the "evacuation of Saigon," and the resultant thousands of lives that were saved, to realize that the American fighting man is just as capable, and more eager, to save lives than he is in having to wage war. The reader can help tell this story by sharing this book with his friends.
