Broadband Satellite Communication Systems and the Challenges of Mobility: IFIP TC6 Workshops on Broadband Satellite Communication Systems and ... in Information and Communication Technology)

Broadband Satellite Communication Systems and the Challenges of Mobility is an essential reference for both academic and professional researchers in the field of telecommunications, computer networking and wireless networks.

Recently the request of multimedia services has been rapidly increasing and satellite networks appear to be attractive for a fast service deployment and for extending the typical service area of terrestrial systems. In comparison with traditional wide area networks, a characteristic of satellite communication systems is their ability in broadcasting and multicasting multimedia information flows anywhere over the satellite coverage. The papers presented in this volume highlight key areas such as Satellite Network Architectures, Services and Applications; Mobile Satellite Systems and Services; and Hybrid Satellite and Terrestrial Networks.

Mobility will inevitably be one of the main characteristics of future networks, terminals and applications and, thus, extending and integrating fixed network protocols and services to mobile systems represents one of the main issues of present networking. The secondary focus of this volume is on challenges of mobility, that is, on technologies, protocols and services for the support of seamless and nomadic user access to new classes of applications in person-to-person, device-to-device and device-to-person environments. The book comprises recent results of research and development in the following areas; Seamless mobility; Mobile ad hoc and sensor networks; Analysis, simulation and measurements of mobile and wireless systems; Integration and inter-working of wired and wireless networks; QoS in mobile and wireless networks; Future trends and issues concerning mobility.

This state -of-the-art volume contains a collection of papers from two of the workshops of the 18th IFIP World Computer Congress, held August 22-27, 2004, in Toulouse, France: the Workshop on Broadband Satellite Communication Systems, and the Workshop on the Challenges of Mobility.

From reader reviews:

Leticia Brewster:

Book is actually written, printed, or descriptive for everything. You can realize everything you want by a book. Book has a different type. As we know that book is important issue to bring us around the world. Beside that you can your reading proficiency was fluently. A e-book Broadband Satellite Communication Systems and the Challenges of Mobility: IFIP TC6 Workshops on Broadband Satellite Communication Systems and ... in Information and Communication Technology) will make you to become smarter. You can feel considerably more confidence if you can know about everything. But some of you think that will open or reading a book make you bored. It is not make you fun. Why they may be thought like that? Have you in search of best book or suitable book with you?

Patricia Whitmore:

In this 21st centuries, people become competitive in every single way. By being competitive currently, people have do something to make all of them survives, being in the middle of the crowded place and notice through surrounding. One thing that sometimes many people have underestimated the item for a while is reading. That's why, by reading a reserve your ability to survive boost then having chance to stand up than other is high. In your case who want to start reading the book, we give you that Broadband Satellite Communication Systems and the Challenges of Mobility: IFIP TC6 Workshops on Broadband Satellite Communication Systems and ... in Information and Communication Technology) book as starter and daily reading e-book. Why, because this book is usually more than just a book.

Angela Smith:

Hey guys, do you really wants to finds a new book you just read? May be the book with the name Broadband Satellite Communication Systems and the Challenges of Mobility: IFIP TC6 Workshops on Broadband Satellite Communication Systems and ... in Information and Communication Technology) suitable to you? Often the book was written by well known writer in this era. The actual book untitled Broadband Satellite Communication Systems and the Challenges of Mobility: IFIP TC6 Workshops on Broadband Satellite Communication Systems and ... in Information and Communication Technology)is one of several books in which everyone read now. That book was inspired many people in the world. When you read this book you will enter the new age that you ever know prior to. The author explained their strategy in the simple way, therefore all of people can easily to know the core of this publication. This book will give you a large amount of information about this world now. So that you can see the represented of the world in this book.

Sandra Lester:

A lot of people always spent their own free time to vacation or maybe go to the outside with them household or their friend. Were you aware? Many a lot of people spent these people free time just watching TV, or

playing video games all day long. If you need to try to find a new activity that is look different you can read a book. It is really fun for you personally. If you enjoy the book you read you can spent 24 hours a day to reading a reserve. The book Broadband Satellite Communication Systems and the Challenges of Mobility: IFIP TC6 Workshops on Broadband Satellite Communication Systems and ... in Information and Communication Technology) it is very good to read. There are a lot of people who recommended this book. We were holding enjoying reading this book. In case you did not have enough space to bring this book you can buy the e-book. You can m0ore simply to read this book through your smart phone. The price is not very costly but this book provides high quality.
