Foundation Engineering: Design and Construction in Tropical Soils (Balkema: Proceedings and Monographs in Engineering, Water and Earth Sciences)

Residual soils are found in many parts of the world. Like other soils, they are used extensively in construction, being built upon and used as construction materials. Residual soils are formed when the processes of rock weathering proceed at a faster rate than the transport processes by water, gravity and wind, whereby much of the resulting soils will remain in place. The soil typically retains many of the characteristics of the parent rock. In a tropical region, residual soil layers can be very thick, sometimes extending for hundred of meters before reaching unweathered rock.

This book has gathered state-of-the-art knowledge from a number of experienced experts working in foundation engineering in tropical residual soils. Subjects covered are: geology and formation of residual soils, site investigations, characterization and selection of parameters for foundation design, design of shallow and deep foundations which include driven piles, drilled shafts and caissons, and special topics which include design of piles in marginally-stable river banks, micro piles, Auger pile, pile load and NDT, foundation failures and remedial works, and pile supported embankment. The book also includes a country case study on engineering geology in relation to foundation engineering in Malaysia.

From reader reviews:

Barry Houde:

Exactly why? Because this Foundation Engineering: Design and Construction in Tropical Soils (Balkema: Proceedings and Monographs in Engineering, Water and Earth Sciences) is an unordinary book that the inside of the guide waiting for you to snap the idea but latter it will jolt you with the secret the item inside. Reading this book beside it was fantastic author who all write the book in such incredible way makes the content inside easier to understand, entertaining method but still convey the meaning totally. You can have new activity to pay your whole day by studying a book. Ugh, ya think reading a book can definitely hard because you have to accept the book everywhere? It all right you can have the e-book, delivering everywhere you want in your Smart phone. Like Foundation Engineering: Design and Construction in Tropical Soils (Balkema: Proceedings and Monographs in Engineering, Water and Earth Sciences) which is having the e-book version. So , why not try out this book? Let's observe.

Alma Lewis:

This Foundation Engineering: Design and Construction in Tropical Soils (Balkema: Proceedings and Monographs in Engineering, Water and Earth Sciences) is new way for you who has attention to look for some information mainly because it relief your hunger of knowledge. Getting deeper you into it getting knowledge more you know or you who still having little bit of digest in reading this Foundation Engineering: Design and Construction in Tropical Soils (Balkema: Proceedings and Monographs in Engineering, Water and Earth Sciences) can be the light food for you because the information inside this particular book is easy to get through anyone. These books build itself in the form that is reachable by anyone, yes I mean in the e-book web form. People who think that in guide form make them feel drowsy even dizzy this e-book is the answer. So there is not any in reading a guide especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss the item! Just read this e-book variety for your better life and knowledge.

Richard Starkes:

Don't be worry if you are afraid that this book will filled the space in your house, you can have it in e-book approach, more simple and reachable. This Foundation Engineering: Design and Construction in Tropical Soils (Balkema: Proceedings and Monographs in Engineering, Water and Earth Sciences) can give you a lot of buddies because by you investigating this one book you have matter that they don't and make anyone

more like an interesting person. This book can be one of a step for you to get success. This reserve offer you information that maybe your friend doesn't realize, by knowing more than various other make you to be great men and women. So , why hesitate? We need to have Foundation Engineering: Design and Construction in Tropical Soils (Balkema: Proceedings and Monographs in Engineering, Water and Earth Sciences).
