RFID Security and Privacy: Concepts, Protocols, and Architectures (Lecture Notes in Electrical Engineering) Dirk Henrici

In the beginning of 2003, I found a short article about the privacy implications of RFID technology in a newspaper. It raised my interest, and after reading some early research papers on the topic, I thought: "There must exist better solutions." I concerned myself with the topic in my spare time. After having developed my first solutions, I asked my supervisor, Prof. Dr. Paul Muller, whether I could write a paper about my results. As the topic did not fit into any running project or at least the overall research directions of his group, he could have answered no. But instead, he encouraged me to do it. The paper became a success, and many other papers about new concepts and solutions followed. Now the answer is obvious: There exist better solutions. I have dealt with the topic over the past years. Now I want to share the basics as well as current research results with the reader. This book is surely not a bedside reading. But with all the presented concepts, it can broaden the mind of the reader concerning security, privacy, and RFID systems. I wish the reader many new insights. There are many people I would like to thank. First of all, my thanks go to my supervisor, Prof. Dr. Paul Muller. He gave me room for creativity and plenty of rope to work on my own.

From reader reviews:

Thomas Kelly:

Have you spare time for a day? What do you do when you have a lot more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to the particular Mall. How about open or even read a book entitled RFID Security and Privacy: Concepts, Protocols, and Architectures (Lecture Notes in Electrical Engineering)? Maybe it is to be best activity for you. You already know beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with its opinion or you have some other opinion?

Joseph Asher:

Information is provisions for those to get better life, information currently can get by anyone with everywhere. The information can be a understanding or any news even restricted. What people must be consider while those information which is in the former life are challenging be find than now is taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you obtain the unstable resource then you understand it as your main information there will be huge disadvantage for you. All of those possibilities will not happen inside you if you take RFID Security and Privacy: Concepts, Protocols, and Architectures (Lecture Notes in Electrical Engineering) as the daily resource information.

Patricia Mattox:

Do you one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Attempt to pick one book that you never know the inside because don't determine book by its include may doesn't work this is difficult job because you are frightened that the inside maybe not since fantastic as in the outside appearance likes. Maybe you answer is usually RFID Security and Privacy: Concepts, Protocols, and Architectures (Lecture Notes in Electrical Engineering) why because the excellent cover that make you consider concerning the content will not disappoint you. The inside or content is definitely fantastic as the outside or maybe cover. Your reading sixth sense will directly direct you to pick up this book.

Eva Pham:

As a pupil exactly feel bored for you to reading. If their teacher requested them to go to the library in order to make summary for some e-book, they are complained. Just small students that has reading's heart and soul or real their passion. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading very seriously. Any students feel that reading is not important, boring and can't see colorful pics on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this RFID Security and Privacy: Concepts, Protocols, and Architectures (Lecture Notes in Electrical Engineering) can make you sense more interested to read.
