# Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science)

## Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science)

With the rapid development of information technologies and the transition to next-generation networks, computer systems and in particular embedded systems are becoming more and more mobile and ubiquitous. They also strongly interact with the physical world. Ensuring the security of these complex and resource-constrained systems is a really challenging research topic. Therefore this Workshop in Information Security Theory and Practices was organized to bring together researchers and practitioners in related areas, and to encourage cooperation between the research and the industrial communities. This was the second edition of WISTP, after the first event in Heraklion, Greece, in 2007. This year again we had a significant number of high-quality submissions coming from many different countries. These submissions reflected the major topics of the conference, i. e. , smart devices, convergence, and next-generation networks. Submissions were reviewed by at least three reviewers, in most cases by four, and at least by five for the papers involving Program Committee members. This long and rigorous process could be achieved thanks to the hard work of the Program Committee members and additional reviewers, listed in the following pages. This led to the selection of high-quality papers that made up the workshop program and are published in these proceedings. A number of posters and short papers were also selected for presentation at the conference. The process was very selective and we would like to thank all those authors who submitted contributions that could not be selected.

**From reader reviews:**

**Loris Beal:**

Book is definitely written, printed, or outlined for everything. You can understand everything you want by a reserve. Book has a different type. As you may know that book is important factor to bring us around the world. Alongside that you can your reading proficiency was fluently. A publication Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science) will make you to become smarter. You can feel considerably more confidence if you can know about every thing. But some of you think in which open or reading a new book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you in search of best book or suited book with you?

**Susan Gagnon:**

What do you think of book? It is just for students as they are still students or this for all people in the world, the actual best subject for that? Just you can be answered for that query above. Every person has several personality and hobby for every other. Don't be pushed someone or something that they don't desire do that. You must know how great and also important the book Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science). All type of book are you able to see on many sources. You can look for the internet methods or other social media.

**Paul Day:**

Hey guys, do you desires to finds a new book to study? May be the book with the title Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science) suitable to you? Often the book was written by renowned writer in this era. The particular book untitled Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science) is the one of several books that will everyone read now. This specific book was inspired many people in the world. When you read this guide you will enter the new dimension that you ever know prior to. The author explained their thought in the simple way, thus all of people can easily be aware of the core of this book. This book will give you a lots of information about this world now. In order to see the represented of the world in this book.

**Marilynn Johnson:**

The e-book untitled Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science) is the publication that recommended to you to study. You can see the quality of the e-

book content that will be shown to anyone. The language that article author use to explained their way of doing something is easily to understand. The article author was did a lot of research when write the book, and so the information that they share to you personally is absolutely accurate. You also could possibly get the e-book of Information Security Theory and Practices. Smart Devices, Convergence and Next Generation Networks: Second IFIP WG 11.2 International Workshop, WISTP ... 2008 (Lecture Notes in Computer Science) from the publisher to make you a lot more enjoy free time.
