## **Janos Bolyai, Non-Euclidean Geometry, and the Nature of Space** Jeremy J. Gray

Janos Bolyai (1802-1860) was a mathematician who changed our fundamental ideas about space. As a teenager he started to explore a set of nettlesome geometrical problems, including Euclid's parallel postulate, and in 1832 he published a brilliant twenty-four-page paper that eventually shook the foundations of the 2000-year-old tradition of Euclidean geometry. Bolyai's "Appendix" (published as just that -- an appendix to a much longer mathematical work by his father) set up a series of mathematical proposals whose implications would blossom into the new field of non-Euclidean geometry, providing essential intellectual background for ideas as varied as the theory of relativity and the work of Marcel Duchamp. In this short book, Jeremy Gray explains Bolyai's ideas and the historical context in which they emerged, were debated, and were eventually recognized as a central achievement in the Western intellectual tradition. Intended for nonspecialists, the book includes facsimiles of Bolyai's original paper and the 1898 English translation by G. B. Halstead, both reproduced from copies in the Burndy Library at MIT.

### **From reader reviews:**

#### **Lawrence Rector:**

Information is provisions for anyone to get better life, information currently can get by anyone at everywhere. The information can be a information or any news even a huge concern. What people must be consider whenever those information which is within the former life are difficult to be find than now could be taking seriously which one is suitable to believe or which one the actual resource are convinced. If you have the unstable resource then you understand it as your main information you will see huge disadvantage for you. All those possibilities will not happen within you if you take Janos Bolyai, Non-Euclidean Geometry, and the Nature of Space as the daily resource information.

#### **Mary Davis:**

People live in this new morning of lifestyle always attempt to and must have the extra time or they will get lots of stress from both day to day life and work. So , if we ask do people have spare time, we will say absolutely sure. People is human not really a huge robot. Then we question again, what kind of activity do you have when the spare time coming to a person of course your answer may unlimited right. Then ever try this one, reading books. It can be your alternative in spending your spare time, the actual book you have read is definitely Janos Bolyai, Non-Euclidean Geometry, and the Nature of Space.

#### **Jacqueline Harding:**

Do you have something that you prefer such as book? The reserve lovers usually prefer to decide on book like comic, short story and the biggest the first is novel. Now, why not hoping Janos Bolyai, Non-Euclidean Geometry, and the Nature of Space that give your satisfaction preference will be satisfied simply by reading this book. Reading routine all over the world can be said as the opportunity for people to know world far better then how they react towards the world. It can't be claimed constantly that reading practice only for the geeky individual but for all of you who wants to be success person. So , for all you who want to start reading as your good habit, you are able to pick Janos Bolyai, Non-Euclidean Geometry, and the Nature of Space become your starter.

#### **Tanya Caggiano:**

This Janos Bolyai, Non-Euclidean Geometry, and the Nature of Space is great reserve for you because the content which can be full of information for you who all always deal with world and get to make decision every minute. This particular book reveal it data accurately using great plan word or we can claim no rambling sentences inside it. So if you are read this hurriedly you can have whole data in it. Doesn't mean it only will give you straight forward sentences but challenging core information with beautiful delivering sentences. Having Janos Bolyai, Non-Euclidean Geometry, and the Nature of Space in your hand like having the world in your arm, facts in it is not ridiculous one particular. We can say that no book that offer you world inside ten or fifteen small right but this e-book already do that. So , this is good reading book. Hey

there Mr. and Mrs. stressful do you still doubt which?
