Software Defined Networking: Design and Deployment

Patricia A. Morreale, James M. Anderson

Software Defined Networking: Design and Deployment Patricia A. Morreale, James M. Anderson

Software Defined Networking: Design and Deployment provides a comprehensive treatment of software defined networking (SDN) suitable for new network managers and experienced network professionals. Presenting SDN in context with more familiar network services and challenges, this accessible text:

- Explains the importance of virtualization, particularly the impact of virtualization on servers and networks
- Addresses SDN, with an emphasis on the network control plane
- Discusses SDN implementation and the impact on service providers, legacy networks, and network vendors
- Contains a case study on Google's initial implementation of SDN
- Investigates OpenFlow, the hand-in-glove partner of SDN
- Looks forward toward more programmable networks and the languages needed to manage these environments

Software Defined Networking: Design and Deployment offers a unique perspective of the business case and technology motivations for considering SDN solutions. By identifying the impact of SDN on traffic management and the potential for network service growth, this book instills the knowledge needed to manage current and future demand and provisioning for SDN.

From reader reviews:

Darrell Guess:

The book Software Defined Networking: Design and Deployment can give more knowledge and also the precise product information about everything you want. Why then must we leave the good thing like a book Software Defined Networking: Design and Deployment? Wide variety you have a different opinion about publication. But one aim that will book can give many info for us. It is absolutely correct. Right now, try to closer using your book. Knowledge or facts that you take for that, you are able to give for each other; you could share all of these. Book Software Defined Networking: Design and Deployment has simple shape but the truth is know: it has great and massive function for you. You can look the enormous world by open up and read a publication. So it is very wonderful.

John Hickman:

Spent a free the perfect time to be fun activity to do! A lot of people spent their down time with their family, or their friends. Usually they accomplishing activity like watching television, gonna beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your personal free time/ holiday? Could possibly be reading a book may be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to test look for book, may be the publication untitled Software Defined Networking: Design and Deployment can be very good book to read. May be it can be best activity to you.

Megan Kelly:

Are you kind of occupied person, only have 10 as well as 15 minute in your day to upgrading your mind ability or thinking skill also analytical thinking? Then you have problem with the book when compared with can satisfy your short space of time to read it because this all time you only find e-book that need more time to be study. Software Defined Networking: Design and Deployment can be your answer mainly because it can be read by an individual who have those short free time problems.

Kristi Rowden:

A lot of people said that they feel uninterested when they reading a e-book. They are directly felt that when they get a half elements of the book. You can choose the book Software Defined Networking: Design and Deployment to make your own personal reading is interesting. Your own skill of reading talent is developing when you like reading. Try to choose easy book to make you enjoy you just read it and mingle the feeling about book and looking at especially. It is to be very first opinion for you to like to wide open a book and examine it. Beside that the guide Software Defined Networking: Design and Deployment can to be your brand-new friend when you're feel alone and confuse using what must you're doing of that time.
